

Season 1 Episode 24

Ivan Exiled Part 1

The Ultraverse High Government Council is in session. The Prime Leader said, "We have a guest in this commission with us. She is the honorable, Karen Yhanzi. She has an important concern to address with us." Karen takes the stage and she said, "For years I have had my eyes on a boy with a disturbing and concerning history. His name, is Ivan." A projector projects an image of Ivan on the wall behind Karen. Karen said, "I have known Ivan for years. He has an unhealthy obsession with the Yin-Yang and he believes it has magical powers that will allow him to save the Ultraverse from some unknown force. He has caused a lot of dangers all over the Ultraverse in the last several months. He has ran into Convind in a heavenly world and almost had him set loose. Ivan came across an evil parasite named Vilozoma and it had an unexpected impact on him. Instead of consuming Ivan, it bonded with him as if it had some kind of interest with him. Ivan has been distracted from his job as an Ultraverse Monk where instead of doing what he is ordered to do, he would pursue what he thinks is more important. In a recent case, it was finding this Ultimate Yin-Yang that turned out to be a trap set up by Multisword. Ivan put himself and two other monks in danger. Is this the kind of person that should be a monk in the Ultraverse?" All the people in the High Government Council look at each other. The Prime Leader said, "I know exactly what you are referring to. Ivan should be put on trial. He may be a great danger to the Ultraverse and a greater danger than any of us realize."

Ivan is in his house and he is studying both of his Yin-Yangite books. Ivan sees a part of a map in one book and he sees what looks like part of the same map in the other book. Ivan puts the maps together and it forms a greater map. It highlights where the Yin-Yangite home world is. Ivan said, "That is likely to be where my answers are. I need to find this home world and finally find out the truth about myself and my father so I can put all this anguish and mystery to rest." Keith enters Ivan's house. Keith said, "Ivan. I have just come back from a visit to the universe I am from and the universe where you lived prior to you joining the monks. I had yet another visit with Mason and Mason wanted me to give this to you." Keith hands Ivan a small container filled with Power Pills. Keith said, "They are..." Ivan said, "Mason's Power Pills. I remember these." Ivan gets visions of himself turning into the Yin-Yang superhero.

Ivan, Safron, and Dirk are walking down a street in the Ultraverse. Ivan said, "I think I finally found it. I think I found the location of the main Yin-Yangite home world. It is a far distance away from anything else in the known Ultraverse. I would like your help. You would be helping your great friend learn the truth." Safron said, "I would do anything for you, Ivan." Safron gets close to Ivan and she kisses him. Safron said, "I know this is really important to you and you've been wanting to find out the truth for quite some time now." Dirk said, "It is about time we put this mystery to rest." Karen is walking down the street and she stops in front of Ivan and his friends. Ivan looks scared and he hides behind Safron and Dirk. Dirk said, "Aren't you that dumb principal that hates Ivan for some reason?" Safron said, "Leave Ivan alone. He has done nothing to you." Karen said, "This is not about me. This is about the fate of the Ultraverse. You are coming with me, Ivan." Karen grabs onto Ivan's head. Safron and Dirk try grab onto Ivan and Karen's guards come out and they capture Safron and Dirk and they are thrown into metal cages. Karen takes Ivan to a courthouse and Safron and Dirk are brought to a holding cell.

Karen takes the center stage in the Ultraverse Courthouse. Karen said, "Our subject is the one and only, Ivan." Ivan is kept in a seat where he is strapped in with metal straps. Ivan said, "What's the meaning of this?" Karen said, "You will not speak unless you are spoken to. Now where was I, oh yes. For months now, Ivan has been a serious threat to the Ultraverse. He went out of his way to learn about the Ultimate Yin-Yang and it endangered himself and others. He also cut a poor fellow in half. We will have a victim come in." Borgus enters the courtroom and he is just a torso and a head on a skateboard. Karen said, "Mr. Borgus. Tell me about what this boy did to you." Borgus cries in a fake manner and Borgus said, "It was the worse. Ivan cut me in half with his sword. It wasn't just any sword either. Ivan was angry and he turned into a giant killer mech with a magic sword and he cut me in half with it. He also killed a lot of my friends I had with me. Do you realize how cruel it has been for me?" Karen pats Borgus on the head.

Ivan said, "Borgus tried to reset the Ultraverse by flicking a switch." Karen said, "I told you not to speak. Now Ivan, what do you have to say for yourself?" Ivan said, "I cut Borgus in half and killed some of his people because they wanted to flick a switch in Ultraverse space that would have rebooted the entire Ultraverse. If I didn't do that, Borgus would rule the Ultraverse and none of you would have any of the rights and freedoms that you enjoy." Karen said, "I find that very hard to believe. I also have here that you have been basing your life off a bunch of crap in a series of books that you found from a fat bald monk that lived on a moon. What do you have to say about that?" Ivan said, "That monk was Star Monk. He was expelled by the monk order for being different." Karen said, "So naturally, you listen to everything he says and you take it all at face value?" Ivan said, "We related well to each other." Karen said, "Tell me how you found this, Star Monk?" Ivan said, "I was working on a battleship in Ultraverse space that got attacked. The ship got badly damaged and crashed and most crew mates died except for me." Karen said, "How did you survive then?" Ivan said, "I got lucky." Karen said, "I think you survived because you did something."

Karen goes over some more documents and Karen said, "I believe you have a special relationship with one of your fellow monks. It is the monk called, Safron. What do you have to say about her?" Ivan said, "Safron seems to think highly of me and I think she is a good friend to have around." Karen said, "Are you aware that Safron has passionate intimate feelings for you?" Ivan said, "Safron is not my girlfriend if you are thinking that." Karen said, "Safron is your girlfriend. Think harder about the things she has done when you two are close together." Ivan said, "Well, she does constantly take my side in conflicts and she does praise me a lot. She has kissed me a few times." Karen said, "You see. Ivan has a girlfriend and he doesn't even realize it. I know exactly why all this is."

Karen said, "You see, Ivan has Asperger syndrome. It is a mental disease which makes kids believe crazy things, act irrationally, and ignore certain truths. Ivan has been very irrational about his actions and he believes in this crazy Yin-Yang stuff. I have proof from Borgus and proof from other sources in these documents that Ivan is indeed a threat to himself and the people of the Ultraverse. I know he has friends that were working with him. They deserve to be sent off too since their minds have been contaminated with Ivan's visions. We want to take them and have their memory wiped clean. I think I rest my case." The judge looks over this and he said, "Now the defense must give their statement." Karen said, "I don't think Ivan has a defense." Keith is in the court and he stands and he said, "I have a defense." The judge said, "We will hear what Mr. Keith has to say." Keith takes the center stage and he said, "I have known Ivan for months now. He is quite a formidable fellow. He has made a name for himself mostly by saving my life and others' lives on several occasions. Just recently, I almost got killed by a killer robot on an

arid desert planet. There were death traps everywhere and I was told by a few monks that Karen Yhanzi was the one behind this. I think Ivan was just defending himself. I have watched the things he does. They are no different than any of the things that I do and I have never been brought into court like this. What makes Ivan different from me? How come Ivan gets punished for these things and I do not?" Karen said, "Ivan has Aspergers and you do not. You seem pretty neurotypical to me. What do you think of Ivan and his Yin-Yangite hogwash?" Keith said, "I have been a monk in the Ultraverse for quite a few years now and I have seen some pretty ridiculous things. I have been taught as a monk to accept the fact that anything of any sort can exist in the Ultraverse and it may not make sense but it does make sense to people of a different species. I am a mere human so I don't understand most of Ivan's Yin-Yangite instincts, but I do understand that Ivan is not a human and his physiology is different from mine. His philosophies are quite different from mine too. If Ivan were to be sent away to some prison, I think I should be sent to this prison too."

The judge said, "The verdict is in. Ivan has Aspergers and he is indeed a danger to the public. Ivan and his accomplices, Safron and Dirk will be sent on a heavily armed prison transport ship to the most heavily fortified prison complex in the Ultraverse. Safron and Dirk's memories will be wiped clean." Ivan's eyes go big and he is carried off.

Karen watches Ivan get shipped away out on a street in the Ultraverse. A skilled assassin dressed in black shows up next to Karen. The assassin said, "You requested my services?" Karen said, "I need you to follow that, Ivan. I know he is going to be brought somewhere where someone will try to capture him and take him away from the prison. I want you to take out anyone that tries to assist Ivan. Also, take note of people that could be of importance to him. Maybe they should get taken out too. I will give you your pay based on what you take out. Happy hunting." The assassin zips away and he sneaks into a hidden door on the prison transport ship and he hides in an obscure closure on the ship.

Ivan is brought onto the prison transport and the guards go through Ivan's things. They find the small container of Mason's Power Pills. The guard said, "How often must you take your prescription medication?" Ivan said, "Everyday around noon and then again at 5PM." The guard writes that down and he places the Power Pill container in an enclosure. The guard also takes Ivan's Yin-Yangite books and keeps them in an enclosure. Ivan is brought to a prison cell. Safron and Dirk are brought to cells too. Safron said, "This is bullcrap." Dirk said, "This is very unfair. We never did anything bad." Safron said, "We were just monks that were doing the right thing as any Ultraverse monk should." A guard walks by and he said, "Shut up you two. This voyage is going to be at least two days so I recommend shutting up and reading approved materials from this cart." Safron and Dirk are given stacks of books on crime psychology and corrects for criminally challenged minds. The guard returns to the bridge of the ship where there is a large map of the Ultraverse with coordinates and there are controllers to control the functions of the ship.

Ivan walks around in circles in his cell. A group of guards walk around Ivan's cell and one of them said, "This is Ivan. He is that dangerous prisoner we have been all hearing about." One of the guards said, "I heard he has, Aspergers." Another guard said, "I would be pretty embarrassed if I had a disease called, Aspergers. It is bad enough he has a disease but calling it Aspergers makes it even worse." The guards laugh. The medicine distributor enters the cell block and they have one of Mason's Power Pills on a plate and they give it to Ivan. The guards laugh and one of them said, "He is taking his Asperger pills." One of the guards said, "They make pills for that now?" Ivan gives them a

stern look and he takes the pill. Ivan grows larger and stronger and he appears in a superhero suit that is yellow and green and has zig zags on it. He has a Yin-Yang on his chest. One of the guards said, "What just happened?" Ivan grabs onto the bars and he breaks them. The guards pull out their guns and they open fire on him. Ivan gives a large wave of his arm and all the guards fall over and are knocked out. Ivan leaves the cell block and he goes to another cell block where Safron and Dirk are kept. Guards and security turrets open fire on Ivan and their shots do nothing. Ivan smacks down all the guards and breaks all the security turrets. Ivan breaks the bars on Safron and Dirk's prison cells. Safron's eyes turn to hearts and she said, "My hero." Ivan said, "I have to get all of you out of here. They think you have been contaminated by me and they are going to have your memories erased." Safron and Dirk's eyes go big. Ivan said, "I will get us out of here."

Ivan breaks into the main bridge. The captain orders the ship into lockdown and the ship goes dark and red lights flash everywhere. Ivan fights off all the guards that come for him. Large swarms of guards jump and pound on Ivan. Ivan gets up and throws all the guards off him. He grabs two guards and he smashes their heads into each other. A guard runs at Ivan from behind and Ivan kicks the guard in the crotch and Ivan smashes his head. The captain is all that's left. The captain gets to a phone and he calls for help. The captain said, "This is Captain Versailles of the largest prison frigate in the Ultraverse. Ivan has broken free and... argh!" Ivan cuts the phoneline and he smacks the captain and throws him into the wall.

Ivan breaks into enclosures in the bridge and he finds his Yin-Yangite books. Ivan opens both of them and he forms the map that shows where the Yin-Yangite home world is. Ivan looks at the large map in the center of the bridge. Ivan said, "Face it. We are criminals now. We can't go back to the Ultraverse mainland. We will just be captured and arrested again and they might do something even worse. We have an opportunity now to find out the truth about the Yin-Yangites and what their deal is." Ivan uses the computerized map on the bridge to find the coordinates of the Yin-Yangite home world. Ivan said, "The Yin-Yangite home world should be at these coordinates. Maybe the people there can help us." Safron and Dirk look at each other. Dirk said, "I guess we have no other choice." Safron said, "Considering all the crap Ivan has just went through, I think it is about time he finds out the truth about his people." Ivan, Safron, and Dirk control the ship and they make it go to the coordinates. The assassin watches over them in the shadows.

The ship arrives at the Yin-Yangite home world. The ship lands and the planet looks like purple and pink crystal. There are beautiful and shiny statues of Yin-Yangites on the walls and there are buildings made of shiny crystal. Ivan, Safron, and Dirk get out of their ship. Dirk said, "Is this the place?" Ivan said, "It looks like it." Safron said, "This better not be another trap." There is a large round crystal building and Ivan, Safron, and Dirk walk into that round building. In the round building, there is a nice view of the stars and Ultraverse space. Yin-Yangites stand around in a circle and Ivan's father is in the center of the circle. Ivan's father sees Ivan, Safron, and Dirk. Ivan's father said, "So, you've come." Ivan's eyes go big. Ivan said, "Is this really you?" Ivan's father said, "It is me." Ivan turns around to Safron and Dirk. Ivan said, "You can see him too, right?" Safron said, "I sure can." Safron goes to Ivan's father and shakes his hand. Safron said, "I am Ivan's girlfriend, Safron. I can see where Ivan gets his dreamy looks from." Ivan's father said, "Yes, thank you." Ivan said, "I have waited months for this. What are the Yin-Yangites and what's their real deal?" Ivan's father said, "I am about to tell you an ancient secret. The truth is that there is no real secret nor prophecy pertaining to the Yin-Yangites." Ivan's eyes go big. Ivan said, "What is with all these books of Yin-Yangite lore

then?" Ivan's father said, "All that information has been fabricated. It was written by Yin-Yangite writers and passed down from generation to generation. The truth is that all of the content in those books is fake. It was written for our entertainment purposes only but some people took it too seriously. I understand that the people in the universe you came from are not much different. They take entertainment franchises way too seriously and they form religions around them." Ivan said, "That can't be it all. There must be more. Why did Fighoni want you gone so badly and why was he strongly against the Yin-Yang philosophies?" Ivan's father said, "As I just told you, some people take this stuff way too seriously. Let me show you our museum."

Ivan's father gives, Ivan, Safron, and Dirk a walking tour of the Yin-Yangite museum. Ivan's father shows them a painting of an average looking businessman. Ivan's father said, "We Yin-Yangites are really just as normal as any other human man. We have jobs, we work for a living, and we try to make our way in the Ultraverse." Ivan said, "I have been told that Yin-Yangites have strange powers." Ivan's father said, "If you go far back into history, Yin-Yangites were crafted by the writers of the Ultraverse to pretty much serve the purpose of 'for every yin there's a yang' and to balance injustices. That was relevant a long time ago when civilizations in the Ultraverse were new and there were constantly conflicts going on between different groups of inhabitants. Those conflicts have long died out but the Yin-Yangite species still remained. Those Yin-Yangites later reproduced and had offspring and the offspring had all the same powers and capabilities as their first ancestors. There really is not much use for the special Yin-Yangite powers. I just wanted history to be preserved." Ivan said, "Star Monk told me that the Yin-Yangite species was not well liked by the Ultraverse Monks and the people in the Ultraverse in general. He also told me that the Ultraverse Monk order was spawned from the Yin-Yangites." Ivan's father shows the next painting and he said, "The Ultraverse Monks were an offshoot of the Yin-Yangites. There is always going to be conflict in the Ultraverse. The scientist in this painting is the Yin-Yangite that ruined it for everyone. His name was Dr. Convind. He invented a life form that serves as a deadly sickness to people in the Ultraverse. The Yin-Yangite powers were responsible for how this life form he named after himself, Convind, came to be." Ivan's father shows paintings of the Yin-Yangite home world and exhibits showcasing Yin-Yangite artifacts. Ivan's father said, "I came to this world because it is not on most Ultraverse maps since it is in an undiscovered and unexplored reach of Ultraverse space. I know the Yin-Yangites have potential to become a powerful protective force in the Ultraverse once again. I know there is bad and I want the Yin-Yangite species to fight against the forces of evil again. I have fought tooth and nail to preserve the Yin-Yangite species. I know they will be safe on this planet."

Ivan's father takes Ivan, Safron, and Dirk to an outside sanctuary filled with more crystal statues and objects of all kinds. There is a crystal Yin-Yang carved on the ground and there is a large spherical Yin-Yang carved into a wall. The assassin hides behind a statue on a ledge on a building structure. He uses a sniper lens to look down at Ivan and his father. The assassin target locks onto Ivan's father and he pulls the trigger and Ivan's father is shot in the head. Ivan, Safron, and Dirk's eyes go big. They see Ivan's father get shot and he falls to the ground. Ivan goes to his father and he said, "What happened?" Ivan's father points to the assassin and he said, "That assassin just shot me. Remember, just because those books are fake, you can still be a hero and still restore the good name of Yin-Yangites to the Ultraverse." Ivan's father falls back and he turns into an egg with gold rims. Ivan sees the assassin runs away. Ivan runs after the assassin.

The assassin is on a crystal ledge that is high above the ground. Ivan climbs up the crystal ledge and Ivan sees the ledge connects to another crystal building and the

assassin runs away from Ivan and he runs to that other building. Ivan runs after the assassin. A Yin-Yang forms over Ivan. Ivan forms into his Yin-Yang mech self-equipped with the blue magical sword as one hand and his arm cannon as another. Ivan gains a lot of speed and he gets close to the assassin. Ivan fires some shots on the assassin and he misses and hits the ground next to the assassin. The assassin falls over and Ivan walks to the assassin. The assassin gets up and he attempts to run away from Ivan but he comes to a dead end where it is possible to fall off the ledge from a great height and land on a hard surface where sharp crystals are growing. Ivan said, "Who hired you to do this?" The assassin says nothing. Ivan said, "Don't make me go to the full extent of my power. I will..." The assassin gets scared and he tries to run at Ivan but he trips and he plummets off the ledge and falls to his death. Safron and Dirk run to Ivan and Safron said, "What happened to him?" Ivan said, "He fell off the ledge because he wasn't watching his step." Karen's guards show up and they aim their guns at Ivan, Safron, and Dirk. Safron and Dirk raise their arms up. Ivan does nothing. Ivan said, "When I played by your rules, you still screwed me over. What is the point in playing by your rules then?" Ivan fires blasts at the guards and he fights them off with his magic sword. More guards show up and one of them tases Ivan. Ivan's mech is deactivated and he forms back into his normal self. The guards beat up Ivan and they lock him in a tight enclosed cage.

Ivan appears back in Ultraverse court and Karen stands over him. Karen said, "You see? We tried to send Ivan to one of the toughest prisons in the Ultraverse and he somehow managed to escape that. He broke his friends free and he forced them against their will to go on his crazy adventure. I guess we cannot get Safron and Dirk's memory erased since the only place for that is the top security prison where we cannot send any of you to since you are just going to break free somehow. I think we need to keep Ivan in solitary confinement in the Ultraverse mainland where he will be watched at all times. Ivan truly is a danger to the Ultraverse and he killed my innocent friend that happened to be there." Karen holds up a picture of the assassin. Ivan said, "That assassin killed my father. My father was the only connection I had with my past and now I..." Karen said, "Shut up." The judge said, "Ivan will be sent to the Ultraverse mainland's high prison where he will be placed in solitary confinement and have no contact with the outside world. Since Safron and Dirk were involuntarily brought into this, they will not be held responsible for this. They are free to be monks again since they will now be without Ivan's influence."

Ivan is sent out of the courthouse and Ivan sees Safron. Ivan said, "I am being sent to prison here in the Ultraverse. I knew everything about this reality is a mess." Safron cries and she hugs Ivan. Safron gives Ivan a kiss and Safron said, "I always did love you, Ivan. I knew the moment I first laid eyes on you that I have a goal to marry you and live together forever. I am not sure if that is going to happen now with you being in prison. Just remember, I still love you, regardless." Ivan is brought off to a security tight prison where his arms and legs are tied in chains and he is stuck in the center of a large room that is tightly sealed and watched by a group of guards in a control center.

To be Continued
